

QUALITY POLICY STATEMENT

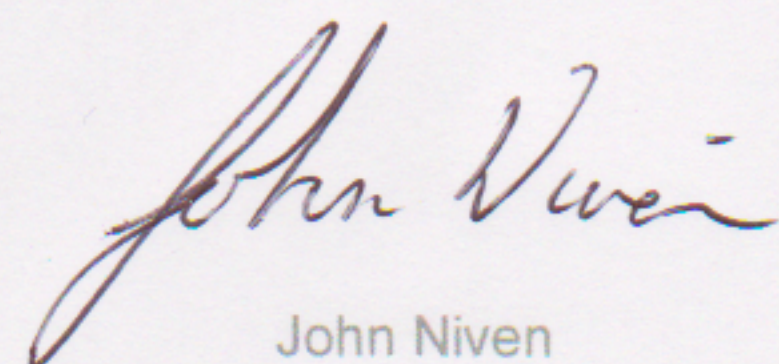

Orthogonal Ltd. is an engineering company specialising in production and supply of polymer parts using additive manufacturing, design for additive manufacturing and reverse engineering for all industrial sectors.

The company's policy is to deliver high quality parts and engineering services to the agreed specifications utilising the latest additive manufacturing technologies.

Our aim is to:

- produce reliable and accurate product with full process control
- provide engineering services by qualified personnel to meet the specified purpose
- Operate an effective Quality Management System based on the BS EN ISO 9001:2015 requirements
- Continuously improve the effectiveness of our Quality Management System

The Director will ensure that the requirements of this policy are communicated and understood by everyone engaged in Orthogonal activities.
